

Drivers

1

Population health needs are changing.

People are living longer with multi-morbidity. People aged over 75 make up 10% of the population and this is forecast to increase by 25% by 2021.

2

Our services are stretched and struggling to keep up with growing demand.

Across the Wessex region we have recruitment and retention challenges facing GPs and other professions.

3

Financial pressures across all organisations.

To achieve financial stability we need to move the balance of future health and care expenditure into the community, and more importantly, into preventative services.

Domains of our care model

IMPROVING ACCESS TO CARE

EXTENDED PRIMARY CARE TEAMS

FEWER STEPS TO SPECIALIST SUPPORT

ENGAGEMENT, PREVENTION AND SELF MANAGEMENT
